

## Basic HTML Application

- This is how I use basic HTML Application.
- Homepage with header, body, intro with my image.

```
<!-- end s-header -->

<!-- Intro
===== -->
<section id="intro" class="s-intro target-section">
  <div class="row intro-content">
    <div class="column large-9 mob-full intro-text">
      <h3>Hello, I'm Datu Ramzy Yusop</h3>
      <h1>
        Enthusiastic about leveraging technology for solving real-world
        problems.
      </h1>
    </div>

    <div class="intro-scroll">
      <a href="#about" class="intro-scroll-link smoothscroll">
        Scroll For More
      </a>
    </div>

    <div class="intro-grid"></div>
    <div class="intro-pic"></div>
  </div>
</section>
<!-- end intro -->

<!-- about
===== -->
<section id="about" class="s-about target-section">
  <div class="about-me">
    <div class="row heading-block" data-aos="fade-up">
      <div class="column large-full">
        <h2 class="section-heading">About Me</h2>
      </div>
    </div>
  </div>
</section>
```

## Result
